

2022 PALOMAR HEALTH PGY2 INFECTIOUS DISEASES RESIDENCY

PREPARING THE PHARMACY LEADERS OF THE FUTURE

Train at a new, \$956 million state-of-the-art facility in Escondido, California. Palomar Medical Center Escondido opened in August 2012 and serves as a symbol of Palomar Health's commitment to becoming the health care system of the future.

Palomar Health is a public health care district in Inland North San Diego County with hospitals in Escondido and Poway, in addition to several other facilities in the region. With a service area of more than 800 square miles, Palomar Health is the largest public health care districts in California.

As North County's most comprehensive health care delivery system, "Palomar Health is recognized for clinical excellence" in cardiac care, women's services, orthopedics, trauma, rehabilitation and behavioral health services. Facilities include Palomar Medical Center Escondido, Palomar Medical Center Poway, The Villas at Poway Skilled Nursing Facility, Palomar Center for Behavioral Health and Palomar Health Home Health Services. Additionally, Palomar Health is affiliated with Rady's Children's Hospital and Kaiser Permanente providing care for the local pediatric population and patients without immediate access to a Kaiser-owned facility.

Palomar Health's vision is to be the health system of choice for patients, physicians and employees, recognized nationally for the highest quality of clinical care and access to comprehensive services.

"The mission of Palomar Health is to heal, comfort and promote health in the communities we serve."

– Newsweek

PALOMAR HEALTH PHARMACY SERVICES

Vision Statement:

To improve patient outcomes by providing compassionate care through medication management, education and collaboration with professional colleagues.

Our Purpose:

The foundations of services provided by Palomar Health's Department of Pharmacy Services are:

- Contribute to optimal therapeutic outcomes.
- Provide information for appropriate application of pharmacotherapeutics.
- Maintain an efficient and fail-safe drug distribution system.
- Support healthcare providers in the delivery of distinguished patient care.
- Support clinical research efforts.
- Attract, develop and retain highly qualified pharmacists and technicians.

Pharmacy Services:

The Pharmacy Department provides comprehensive services on both campuses (PMC Escondido and PMC Poway).

The facilities have implemented a completely automated distribution model, consisting of automated inventory management, robotic IV admixture and automated dispensing cabinets. Clinical services include pharmacokinetics, anti-coagulation management, total parenteral nutrition, renal dosing, antibiotic utilization evaluation and investigational drugs. Additionally, a team of pharmacists on the units also provide discharge counseling and medication reconciliation for high-risk patients and post-operative orthopedic patients.

Serving on a host of committees and several rounding teams, pharmacists are vital members of the healthcare team within Palomar Health.

PGY2 INFECTIOUS DISEASES RESIDENCY

PGY2 Program Purpose: PGY2 pharmacy residency programs build on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in advanced or specialized practice. In addition to providing pharmacy Infectious Diseases experience at Palomar Medical Center Escondido, the resident will be responsible for Palomar Medical Center Poway and the skilled nursing facility The Villas at Poway. PGY2 residency provides residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and incorporating both into patient care to improve medication therapy. Residents who successfully complete an accredited PGY2 pharmacy residency should possess competencies that qualify them for clinical pharmacist and/or faculty positions and position them to be eligible for attainment of board certification in that practice area (when board certification for the practice area exists).

OVERVIEW OF PROGRAM STRUCTURE

The **Palomar Health PGY2 Infectious Diseases** residency program will be designed to develop the resident's skill as a clinical specialist in infectious diseases. The goal will be to provide the candidate the skill and experience required to lead an antibiotic stewardship program at a community hospital in concordance with the Centers for Disease Control and Prevention (CDC) core elements and to meet the requirements designated to fill the role as a pharmacist with advanced training in infectious diseases. The resident will gain experience and develop best practice in the clinical pharmacy infectious diseases and will provide optimal antimicrobial therapy to the patients and community we serve. In addition to daily patient care skills, the resident will develop skills in maintaining the required antimicrobial usage measurements to comply with the CDC core elements and those required by the National Health

REQUIREMENTS FOR COMPLETION

- › Completion of all required (core) learning experiences
- › At least 80% of objectives from 2019 ASHP Required Competency Areas, Goals and Objectives for PGY2 Infectious diseases Pharmacy Residencies marked as "Achieved" AND all core PGY2 objectives as designated by the RPD as "Achieved"
- › Completion of residency project, including presentation at a national conference and final manuscript
- › Completion of all evaluations within 7 days of due date
- › Exit Interview with both Director of Pharmacy and Residency Program Director

and Safety Network. The resident will act as a co-chairman for the anti-microbial subcommittee; attend medical staff department meetings, infection control meetings and related subcommittees. The resident will develop and implement strategic initiatives and new programs, and lead clinical practice in accordance with Palomar Health Pharmacy Department. The resident will work closely with the Infectious Diseases physician, and other disciplines including the microbiology laboratory, infections control practitioners, nursing, information technology and other departments consistent with infectious diseases. Throughout the year, the resident will be expected to independently manage and precept PGY-1 residents and pharmacy students. It will be an expectation and goal at the end of the experience that the resident will be qualified and prepared to obtain board certification in infectious diseases.

LEARNING EXPERIENCES

Activities:
